

Internship/graduation project Applied Psychology at Inversable

This is an example of an internship assignment that was done at Inverable in the past. We would love to discuss relevant opportunities and possibilities when you get in touch with us.

Are you a student of Applied Psychology specialized in Behavior and Technology? Are you looking for a challenging internship or graduation project? Than we might be the right fit for you. Inversable has an exciting assignment for the ICT product Voorstroom. Inversable is a young and fast growing IT company with an enthusiastic team. We are located in Deventer, where we spend every day building innovative IT products that have an impact on society. Voorstroom is one of these products. It's a tool that allows local energy cooperations to better organize themselves and manage local, communal and sustainable energy projects like a solar park. Visit voorstroom.nl for more information (this site is in Dutch).

These energy cooperations are usually ran by volunteers. We want to better support them in their tasks. That's why we are curious what issues they run into when using Voorstroom, how we can help them better understand and use the product and how we can involve them more in new developments.

When you get started at Voorstroom, you will have first have to get a good understanding of the product and its users, so you know what you're dealing with. Then you will get to work on the questions mentioned above. We will make sure you get in touch with several users. During an internship, the focus will be on working along with us. Although we do always appreciate a proactive attitude and new ideas. During a graduation project, the focus will be on executing independent research or product development. Of course you can count on guidance from our side.

Many students have interned or graduated at Inversable, because we like working together with students. We offer a lot of freedom to shape your internship or graduation project so it suits you best and will guide you through it. We really want you to be able to learn something and that your contribution will be valuable to our team. Students will receive a compensation of €300 a month. Are you interested? Please get in touch with erwin@voorstroom.nl
