Unique opportunity: independent internship/graduation project

For excellent students, we offer the opportunity to work on Open Source projects by adding functions that we need as a company. The exciting part is that this isn't something that's exclusively for us, but you can do this under your own name! You'll be working on a global Open Source project with our guidance. This would concern a technically challenging issue, like adding Single Sign-On in Apache Kafka, expanding functionalities in PenPot or adding SSO in vaultwarden. Are you up for the challenge?

Many students have interned or graduated at Inversable, because we like working together with students. We offer a lot of freedom to shape your internship or graduation project so it suits you best and will guide you through it. We really want you to be able to learn something and that your contribution will be valuable to our team. Students will receive a compensation of €300 a month. Are you interested? Please get in touch with info@inversable.com - Location: Zutphenseweg 6b, 7418 AJ Deventer
