

Internship / graduation project Software Engineering at Inversable

Are you a student of Software Engineering and looking for a challenging internship or graduation project? Than we might be the right fit for you. Inversable is a young and fastly growing IT company with an enthusiastic team. We are located in Deventer, where we spend every day building innovative IT products that have an impact on society. We build apps for different sectors including energy, agriculture, industry and education. Take a look at our website inversable.com or the websites of our products voorstroom.nl and sen-app.nl.

Who are we looking for

As an intern or graduate at Inversable, you will build relevant solutions and work on a challenging case in one of the sectors. What you are working on, will really be applied in one of our apps. That's why we are looking for people who love to apply and expand their knowledge with an exciting and challenging assignment. We expect that you can work independently, but will of course provide you with guidance from a team of experienced software engineers. You will be able to learn a lot at Inversable and we are open to your input and ideas. It is also possible to work on a project based on your own interests, as long as we see the relevance. For instance, this could be developing a generic micro service.

Technologies

At Inversable we use, among others, the following technologies:

- Typescript / NodeJS
- Angular / Material Design
- SQL / GraphQL
- Python / Jupyter

What people have worked on in the past

A few examples of what students and graduates have worked on in the past:

- A service for built-up environment, combining open (geographical) data, Statistics Netherlands, Land Register and EAN-codebook (smart meters)
- A service for weather forecasting, combining several resources (such as OpenWeatherMap and KNMI) in one service that can provide information based on longitude and latitude
- A module to upload and view photos for one of our applications

Internships / graduating at Inversable

During your internship or graduation project at Inversable, you will be part of the content team and join us in thinking about how we can best develop our strategies. During an internship, the focus will be on working along with us. Although we do always appreciate a proactive attitude and new ideas. During a graduation project, the focus will be on executing independent research or product development. Of course you can count on guidance from our side.

Many students have interned or graduated at Inversable, because we like working together with students. We offer a lot of freedom to shape your internship or graduation project so it suits you best and will guide you through it. We really want you to be able to learn something and that your contribution will be valuable to our team. Students will receive a compensation of €300 a month. Are you interested? Please get in touch with info@inversable.com
